

Helping Families Grow Healthy Children.

HEALTHY SCHOOLS ACT INTEGRATED PEST MANAGEMENT PROGRAM

The Healthy Schools Act requires schools and child care centers in California to comply with requirements when they use any kind of pesticides on school grounds including antimicrobial pesticides like bleach. Beanstalk's first priority is to keep children, families and staff safe. We have adopted an effective, low-risk pest management practice, also known as integrated pest management, or IPM. You may also obtain additional information on the Department of Pesticide Regulation (DPR) website: www.cdpr.ca.gov/schoolipm.

With the help of staff and pest management professionals, Beanstalk programs can successfully maintain clean, healthy, and safe spaces by inspecting the classroom-indoors and outdoors, monitoring for pests, notifying our parents and staff of pesticide applications, implementing prevention practices and offering regular staff trainings.

Parents, volunteers and staff will be provided a list of chemicals that may be used during the year at our Beanstalk facilities. This list includes exempt and non-exempt chemicals. Chemicals that are exempt can be used anytime without notice. They include ingredients, which are mostly non-toxic to humans such as: castor oil, cedar oil, cinnamon oil, citric acid, citronella, etc. Non-exempt chemicals are chemicals that may be toxic to humans.

Attached is the list of chemicals and an Advisory to Parents and Staff form. Please review the list of chemicals and complete the form. Return it to the Center Supervisor of your Beanstalk center.

BEANSTALK

PESTICIDE MANAGEMENT ADVISORY TO CENTER PARENTS

Based upon the Healthy Schools Act of 2000, Beanstalk has adopted an Integrated Pest Management Program. Inherent with this are efforts to reduce pesticide use as much as possible. While it may occasionally be necessary to apply a pesticide, these will only be used as a last resort.

You have the right to be informed prior to any pesticide application that might be needed in your Beanstalk center or work site. In an emergency, pesticides may be applied without prior notice, but you will be provided notice following any such application. To receive notification, please complete the following information. *If the form is not returned, we will assume you do not want to be notified.*

At any time should you have questions or concerns about pest management within a Beanstalk center or worksite, contact the Center Supervisor or the Center Manager.

Parents: Complete and return it to your child's Beanstalk center.

California law requires that all employers implement a Written Injury and Illness Prevention Program. (Senate Bill 250 in 1990 created section 3203 of the State worker Health and Safety Codes requiring an ongoing written safety program.) This pesticide notice should be given to your employees as part of your Injury and Illness Prevention Program.

California law requires that we provide you a copy of this pesticide disclosure notice. You have the option to post this notice in a conspicuous place. We strongly advise you to keep this pesticide disclosure notice posted.

Pesticides are the products Clark Pest Control uses to control the target pests listed in your agreement. Pesticides make a better life for all by helping control disease carriers and wood destroying insects, thus protecting our health and property. When properly used, pesticides pose no problems to humans or the environment. Your Clark Technician is a State certified applicator whose knowledge is constantly being upgraded through regularly scheduled training sessions. If you have any questions, please call us at our toll free number: 800-936-3339 or write to: Clark Pest Control, P.O. Box 1480, Lodi, CA. 95241-1480.

STATE LAW REQUIRES THAT YOU BE GIVEN THE FOLLOWING INFORMATION: PESTICIDE NOTICE (SECTION 8538)

CAUTION: PESTICIDES ARE TOXIC CHEMICALS. Structural Pest Control Operators are licensed and regulated by the Structural Pest Control Board, and apply pesticides which are registered and approved for use by the California Department of Pesticide Regulation and the United States Environmental Protection Agency. Registration is granted when the State finds that based on existing scientific evidence there are no appreciable risks if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized.
