

MILK...

Part of a Healthy Eating Pattern

Drinking milk is an important habit for young children and serving them milk at meals is a CACFP requirement.

Each sip of milk is loaded with essential nutrients needed for growth and development. Milk is high in protein, calcium, potassium, and vitamin D.

Dairy milk delivers more!

- Builds strong bones and teeth
- Contains high-quality protein to help children grow and build strong muscles
- Keeps you fuller between meals and snacks
- Reduces risk of developing type 2 diabetes¹

CACFP Creditable Milk

All of these types of milk are equally wholesome and safe to drink. Whole milk is only creditable for 1 year olds. Low-fat and fat-free milk are only creditable for ages 2 and older. Lactose-free milk is creditable for all ages 1 and older.

Whole Milk

1% Low-Fat Milk

Fat-Free Milk

Lactose-Free Milk

Low-fat and fat-free milk have all the same essential nutrients found in whole milk, but with less fat. No water is added.

Not all 'milk' is the same. Drinks made with nuts, rice, or coconuts often contain little or no protein. Non-dairy beverages that are not nutritionally equivalent to cow's milk are not a creditable replacement for milk in the CACFP.
